Ella Caudill

Module 5 Write-up

       I chose to design my portfolio with the header and footer being constant so each page feels unified and focused on the content of each page. I liked the idea of the header having a wallpaper image that will reflect on my personality with just my name over it to be a simple but appealing way of introducing myself and my portfolio. I wanted the layout of each page be simple and easy to follow the content so I decided to make the text the most distinguishable aspect with links or photos to reflect it. I chose to put the icons for what will most likely be Facebook and Linkedin links on the footer so the viewer could scroll down each page and be guided to a way of learning more about me.
